

## Lighthouse- Summary of 2019

During 2019 Lighthouse our young adults group continued to meet fortnightly and undertook a number of structured themes of studies including “Uncover - see for yourself” a very good introduction to a number of topics looking at John’s gospel, (it is also styled with lots of chemistry pictures which some members (the scientists) specifically liked- see photo).

Another good book we used was “Gospel centred life- becoming the person God wants you to be”.

Evenings continue to be informal, meeting at 1915 we start with obligatory hot drink and biscuits and sometimes something more scrumptious while chatting. At around 1945 we start our study which we alternate who leads and then around 2030 we wrap up with a time of prayer often using a worship song video related to our theme, YouTube offers a myriad of songs on all topics we have discovered. Then about 2045 we finish and chat some more, how long depends on how early we need to be up for work next day.

Also through 2019 we did some additional activities including a walk and for some (Robert) a swim in Crummock and enjoyed bring and share teas every term. It has also been known for some of us to go out for lunch (sausage sandwich at wild zucchinis is especially nice) and visits to lake district wildlife park.

We have shrunk slightly through 2019 in terms of people coming in person, but once a member of lighthouse you remain a member forever, which our university members enjoy.

We plan to continue through 2020 with the same format, Wednesdays fortnightly 19:15-20:45 with additional activities through the year and always welcome new members 17-30s to pop along and if they enjoy it pop back, so please do tell people who may be interested in lighthouse to search for us on Facebook or on Christ church website.
